Name: _____

Dividing Decimals by Whole Numbers A

Divide. Bring the decimal point straight up into the quotient.

1. $9 \overline{)239.4}$

2. $2 \overline{)9.62}$

3. $4 \overline{)29.2}$

4. $7 \overline{)415.1}$

5. $8 \overline{)32.96}$

6. $7 \overline{)455.7}$

7. $3 \overline{)85.2}$

8. $5 \overline{)7.8}$

9. $8 \overline{)575.2}$

10. $5 \overline{)42.45}$

11. $9 \overline{)49.32}$

12. $5 \overline{)11.1}$

Name: **ANSWER KEY**

Dividing Decimals by Whole Numbers A

Divide. Bring the decimal point straight up into the quotient.

1. $9\overline{)239.4} = 26.6$

2. $2\overline{)9.62} = 4.81$

3. $4\overline{)29.2} = 7.3$

4. $7\overline{)415.1} = 59.3$

5. $8\overline{)32.96} = 4.12$

6. $7\overline{)455.7} = 65.1$

7. $3\overline{)85.2} = 28.4$

8. $5\overline{)7.8} = 1.56$

9. $8\overline{)575.2} = 71.9$

10. $5\overline{)42.45} = 8.49$

11. $9\overline{)49.32} = 5.48$

12. $5\overline{)11.1} = 2.22$
